

Job Offer

1 Microbiology Manager

ABOUT DEINOVE

DEINOVE (Euronext Growth Paris: ALDEI) is a biotech company, based in Montpellier (South of France), that seeks to develop new technological standards and innovative compounds to meet the planet's social and economic challenges : the fight against antibiotic resistance by the discovery of natural compounds with antimicrobial activities.

Position:

We're looking for an enthusiastic and self-directed Microbiology Manager who will lead and develop our Microbiology team. He / She will have the responsibility to drive the discovery, production and development of therapeutic secondary metabolites from the microbial metagenome.

Responsibilities:

- Drives platform technology development projects, and manages method development, protocol preparation, report approval,
- Proposes and organizes characterization strategies of antimicrobial activities,
- Analyses data to provide proposals for future directions,
- Manages the team with responsibility for all people aspects (recruitment, talent development and performance management.

Requirement :

- Ph.D. in microbiology and / or medicinal microbiology
- 8 years' experience in biopharmaceutical industry research, in an area relevant to anti-infective drug development
- First-hand experience and deep understanding of methods covering the development of antibacterial drugs
- Experience in aseptic environment required
- Passionate about your work and science
- Ability to manage and deliver on multiple objectives under aggressive timelines
- Fluent in English and French
- Team spirit
